“This is a large building just besides a large dirt track on Aldridge Road.”

(a) Language-guided target search

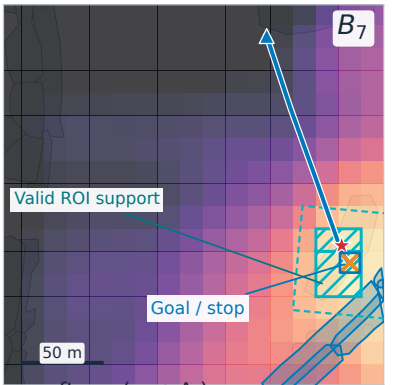

Landmark + candidate locations

(b) Map-geometric goal grounding

Language + geometry → global belief

(c) Belief-guided navigation

$B_t = \mathrm{softmax}(s_0 + \Delta_t)$

$\|B_7 - B_0\|_1 = 0.0262$; final error 11.95 m

Same world-XY crop in all panels; GT is analysis-only.

● Candidates ★ GT — Path

Goal probability · shared log scale

10^{-5} 10^{-3} 10^{-2}

ROI support ≠ target visibility
